(57) Abstract

The invention relates to sulphonamide derivatives of formula (I),

5

10

where

 R_{C} is optionally substituted 4-6-membered heterocyclic ring containing one or more N atoms, or

R_C forms together with the phenyl ring to which it is attached a benzodioxolyl group, or

R_C is -NR¹R²,

R_A is a group having the formula

$$-(CH=CH)_{n} - S = R^{3}$$

$$R^{4} \qquad (B) \text{ or }$$

20

$$-(CH=CH)_{n}$$

$$-(CH=CH)_{n}$$

$$R^{3}$$

$$R^{4}$$

R_B is hydrogen or alkyl.

The invention also relates to the use of derivatives of formula (I) as inhibitors for collagen receptor integrins and a process for preparing sulphonamides of formula (I).
